	3.14 Make a Reusable Item & Draw a Model	Pg. 21
	3.15 Debate	Pg. 25
<b>Take Action</b>	4.2-4.4 Strategy Practice	Pg. 27
	4.6-4.8 Draft Your Podcast	Pg. 29
	4.9 Final Draft	Pg. 34
	4.10 Practice	Pg. 36
<b>Reflect</b>	4.12 Reflect	Pg. 37

## 1.1 Fact Finder Notes

Your mission is to help stop plastic pollution. We'll do this by reducing the use of single-use plastic and educating others on how they can help.

Your mission is to collect information that will help you with your final project. Every time you watch a video, read a text, or do an activity, you should write down new information that you think will help you with your project.

Here are some questions to think about. Any time you learn new information about one of these questions, write it down.

**Why and how was plastic invented?**

## 2.2 Can Acts of Kinship Help with Plastic?

**Directions:** Take a look at the picture of the national park in Vietnam in lesson 2.2 C in the project module. Read about the park. Then, answer the questions below.

**Who do you think should be responsible for solving this problem? The people who live there? Others?**

**What are some individual and collective acts of kinship that could be used to solve this problem?**

## 2.3 Random Act of Kindness

**Directions:** Now it is time for you to perform a random act of kindness to surprise others with kinship. Use the prompts below to plan and carry out your random act of kindness.

**Remember:**

- A random act of kindness is when you do something kind for someone else when they are not expecting it.
- You can perform a random act of kindness for anyone, including: a friend, a family member, someone at your school, or even someone you don't know that well.
- Random acts of kindness involve doing kind things for others without expecting anything in return.

### RANDOM ACTS OF KINDNESS EXAMPLES

- Do a chore for someone without them knowing.
- Make a homemade card with a thoughtful note to give to someone.
- Deliver hand-picked flowers or a homemade treat to someone.
- Make a phone call to a grandparent or anyone you suspect would enjoy some conversation.
- Make a chalk art message, hopscotch, or game on the sidewalk for your neighbors to enjoy.

**Who will you perform your random act of kindness for? Why did you choose this person?**

**What will your random act of kindness be? Why did you select this act?**

## 3.1 Vocabulary

**Directions:** Pick three words you think will be hardest to remember. Draw a picture for each word, label your picture with the word, then use that word in a sentence. **Bonus points** if you can use the word **protect**, **ocean**, or **air** in one of your sentences, just for fun.

## 3.5 Plastic Inventory

**Directions:** Before you can reduce the amount of plastic you use, it is important to understand how much plastic you are using. Use the form below to identify all of the ways you use plastic in your home. Write down the location of the item, the name of the item, how frequently you use the item, and how easy or difficult it would be to reduce or eliminate the use of the item. If you are unable to complete the inventory at home, you can do it in your classroom. The first row has been completed with an example.

### My Plastic Inventory

location of item	name of plastic item	frequency of use	difficulty to reduce
bathroom	bottle of hand soap	daily	medium
